

All you need to know about...

## The Enterprising Researcher

Are you an **enterprising** researcher?

**What does being enterprising actually mean to you? How can you unlock more of your enterprising qualities to make real research impact?**

During June and July and in collaboration with the Enterprise Champions Programme we are delivering a trio of 2 hour lunchtime learning sessions especially designed with you, the enterprising researcher, in mind.

Using a coaching approach these informal and interactive sessions are all about you and aim to provide time and space for you to identify and reflect on your current enterprising qualities and think how you can use your enterprising capabilities now and in the future.

Developing your entrepreneurial skills will help you in your research, benefit your future research career and underpin your employability whatever career path you choose to take.

**24 June 2014:**
